

# Bulk Module

Quality • Durability • Energy Efficiency • Operational • Flexibility

Bulk has specifically designed the Bulk Module for the needs of the Scandinavian logistics facility operator.

With reduced construction timescales and industry leading performance and flexibility of your new facility. By specializing in logistics and industrial real estate, we fully understand the many critical operational features that are essential in such a building. Such features are continuously incorporated into the standard Bulk Module.

The bulk module is designed to maximize utilization when storing pallets.

The module is approx. 7 200 m<sup>2</sup> in footprint and is maximized in size in relation to Norwegian fire requirements, ie without a firewall. Grid that provides an optimal racking solution with 3.0 m wide driving aisles.

Ground clearance of 11.7m (8 standard pallets in height) and approx. 16,000 pallets, additional pallets without mezzanine areas.
